Reviews

This publication is really gripping and exciting. It really is basic but unexpected situations in the 50 % in the book. It is extremely difficult to leave it before concluding, once you begin to read the book.

FBC LTD, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from The Wheat Situation, Including Rye: September 23, 1937 Prospective world wheat supplies, according to the Bureau of Agricultural Economics, indicate that, if disappearance in 1957-58 is about the same as the average for the past 5 years, world stocks next summer will still be 50 million bushels or more below the average which prevailed prior to the accumulation of stocks in 1929-55. Prospective world supplies for the current year (beginning July excluding Soviet Russia and China, are now estimated to be about 60 million bushels larger than the small supplies of 1956-57. Carry-over stocks, now estimated at 210 million bushels less than last year, are more than offset by a 270 million-bushel increase in the estimated world crop. Carry-over stocks in European importing countries have been greatly diminished and are now probably at or very near the low point, even considering the next few years. Imports by Europe in 1957-58, however, are not expected to increase stocks next July above present levels, unless the political situation should become so tense as to bring about the desire for larger reserves. With the rather high prevailing wheat price levels, together with the limited gold supplies and financial and trade difficulties in many countries, any large reserve purchases probably will be postponed as long as possible.
