

Laboratory Techniques in Thrombosis: A Manual (Hardback)

Filesize: 2.1 MB

Reviews

I just began reading this pdf. It is actually written in straightforward words instead of hard to understand. Once you begin to read the book, it is extremely difficult to leave it before concluding.

LABORATORY TECHNIQUES IN THROMBOSIS: A MANUAL (HARDBACK)

To read **Laboratory Techniques in Thrombosis: A Manual (Hardback)** PDF, remember to follow the hyperlink beneath and download the ebook or gain access to other information which are related to LABORATORY TECHNIQUES IN THROMBOSIS: A MANUAL (HARDBACK) book.

Kluwer Academic Publishers, United States, 1999. Hardback. Book Condition: New. 2nd rev. ed. 1999. 234 x 156 mm. Language: English . Brand New Book. The first edition of this manual appeared in 1992 and was entitled ECAT Assay Procedures. It was the result of a unique cooperation between experts brought together by the European Concerted Action on Thrombosis and Disabilities (ECAT). The Concerted Action was at that time under the auspices of the Commission of the European Union. The second edition, like the first edition, deals with diagnostic tests within the field of thrombosis. However, the second edition has a broader scope because it is no longer limited by the frontiers of ECAT. Experts all over the world, in and outside ECAT, have contributed to this edition. The editors are very grateful for their contributions. The need for a new edition is obvious. Since 1992 new assays have been introduced for research, diagnosis, and therapy of thrombosis; for other assays improvements have been suggested, while a few others became redundant. The editors waived the radioimmunoassays of α -thromboglobulin and platelet factor 4 due to the fact that the kits required for these assays are rarely, or no longer, available. Also the PAI-1 activity assay was waived as it is liable to many inconsistencies and to large variations. A list of names and addresses of manufacturers marketing the kits and reagents has been compiled, together with a list of the recommended nomenclature of quantities in thrombosis and haemostasis, in order to facilitate the use of the updated version. These lists have been carefully compiled by Johannes J. Sidelmann, PhD, Department of Clinical Biochemistry in Esbjerg, Denmark.
