SEISMIC EVALUATION OF JOINTS BEFORE AND AFTER RETROFITTING

Seismic evaluation of joints before and after retrofitting
Seismic evaluation of RC beam column joint (t-joint) strengthened with FRP wrapping under cyclic load

LAMBERT

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Seismic evaluation of RC beam column joint (t-joint) strengthened with FRP wrapping under cyclic load | Earthquakes have shown that seismically deficient RC frames are particularly vulnerable to seismic action. Direct observation of damaged structures has shown that damage occurs usually at the beam-column joints with failure in bending or shear, depending on geometry and reinforcement distribution and type. After earthquake structures were classified as slightly damaged, thus being uneconomic to replace...
