

## Safety Differently: Human Factors for a New Era, Second Edition

Filesize: 5.7 MB

### ***Reviews***

*Very helpful to any or all category of folks. It is written in simple phrases rather than difficult to understand. It has been developed in an exceptionally simple way and is particularly just after I finished reading this pdf in which it basically transformed me, modified the way in my opinion.*

## SAFETY DIFFERENTLY: HUMAN FACTORS FOR A NEW ERA, SECOND EDITION

CRC Press, 2014. Book Condition: New. Brand New, Unread Copy in Perfect Condition. A+ Customer Service! Summary: "Sidney Dekker has established himself as the foremost thought leader on accident causation and human error. He points out that we continue to follow linear thinking about accidents and look at the person and the choices they make as the problem. Thus, we develop ineffective interventions intended to "fix" workers through motivation, training, and discipline. . Through this book, Dekker calls on safety professionals to stop and think critically about the path forward. He calls for us to engage in a conversation about how we look at human error. The time has come for a new era that better understands human error in the context of work, and the overriding importance of improved work design; design that is tolerant of human error and allows humans who make mistakes or become confused to fail safely." --Richard A. Pollock, President, CLMI Safety Training and American Society of Safety Engineers "As expected Sidney Dekker compels the next level of productive thinking. It is a challenge to think broader and react less. He tells the how and why of "old view" sociotechnical embeddedness and reveals why its usefulness has diminished. . Sidney writes in such a way that the whole book becomes an example of applied "local rationality". . He provides strong motivation to embrace the hard work of developing a holistic perspective mindset and break free of dualistic deconstructionist approaches and language." --Paul Nelson, MSc, Nelson HF Safety Consulting, LLC ". an exciting expos of the current system of safety management and how it came to be. . Professor Dekker asks us to look beyond the purely technical, and to reflect on our feelings about safety processes. Then he presents a clear story about why these...
