Book Condition: New. Publisher/Verlag: Springer, Berlin | Toward Clinical Trials of Glioma Treatment | Proceedings of an international workshop and plenary meeting entitled Towards Clinical Trials of Glioma with Boron Neutron Capture Therapy, held September 18-20, 1991, in Petten, The Netherlands | The European Collaboration on Boron Neutron Capture Therapy (BNCT), conceived in 1987 and successful in 1989 in gaining financial support as a Concerted Action through the Medical and Health Research Programme of the Commission of the European Communities (CEC) in Brussels, considered it an opportune moment to hold its annual Plenary Meeting on 18-20 September 1991 as an International Workshop entitled "Towards Clinical Trials of Glioma with BNCT". The background to this consideration was influenced by the world-wide resurgence of interest in NCT over the last 2 decades and by the exemplifications at the Fourth International Symposium on Neutron Capture Therapy for Cancer held in Sydney in December 1990, where it was strongly indicated that within the next 2 years clinical trials would be started both in Europe and the United States. In particular at the High Flux Reactor of the Joint Research Centre of the CEC at Petten in The Netherlands, an epithermal neutron beam designed and installed in the summer of 1990 recently became operable at full reactor power. An extensive series of experiments, including the nuclear and radiobiological characterisation of the beam and a healthy tissue tolerance study on canines has started and has the aim to define the preconditions for clinical trials on patients with Grade III/IV glioma. However, as with any other new therapy modality, it must be demonstrated that BNCT is safe for the patient and has a reasonable chance of being an effective therapy. | Opening Speech; E.D. Hondros. Welcome Address; H.H. van der Kroonenberg. Safety and Efficacy in Boron Neutron Capture...
